Mr. Randy Didier
Tobyhanna Army Depot
Attn: SKSTO-AF-E
Tobyhanna, PA 18466

Dear Randy:

On November 18, 1992, USDA Forest Service personnel conducted a gypsy moth egg mass survey at Tobyhanna Army Depot. The purpose of this survey was to determine population densities and to assess the potential for defoliation and the need for treatment in 1993.

The survey plot locations are shown in Figure 1. As you already know, zero egg masses were detected during the survey. Gypsy moth populations are, at most, extremely low. No noticeable defoliation is expected at Tobyhanna Army Depot so treatment is not necessary in 1993.

If you have any questions or require additional information, please call me at 304-285-1541.

Sincerely,

Rodney L Whiteman
